Task 1 – Implementation of a to do application using angular

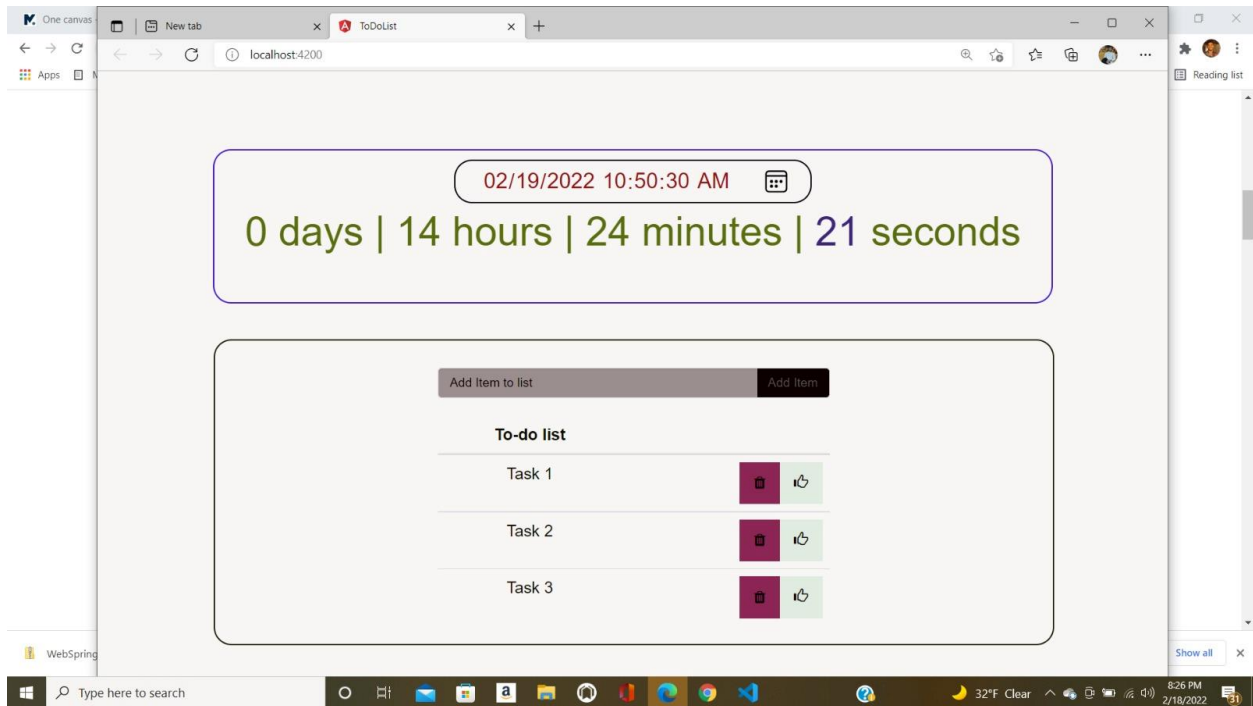

Task 2 – Implementation of a Countdown timer using angular

We have combined both the tasks and implemented as a single task.

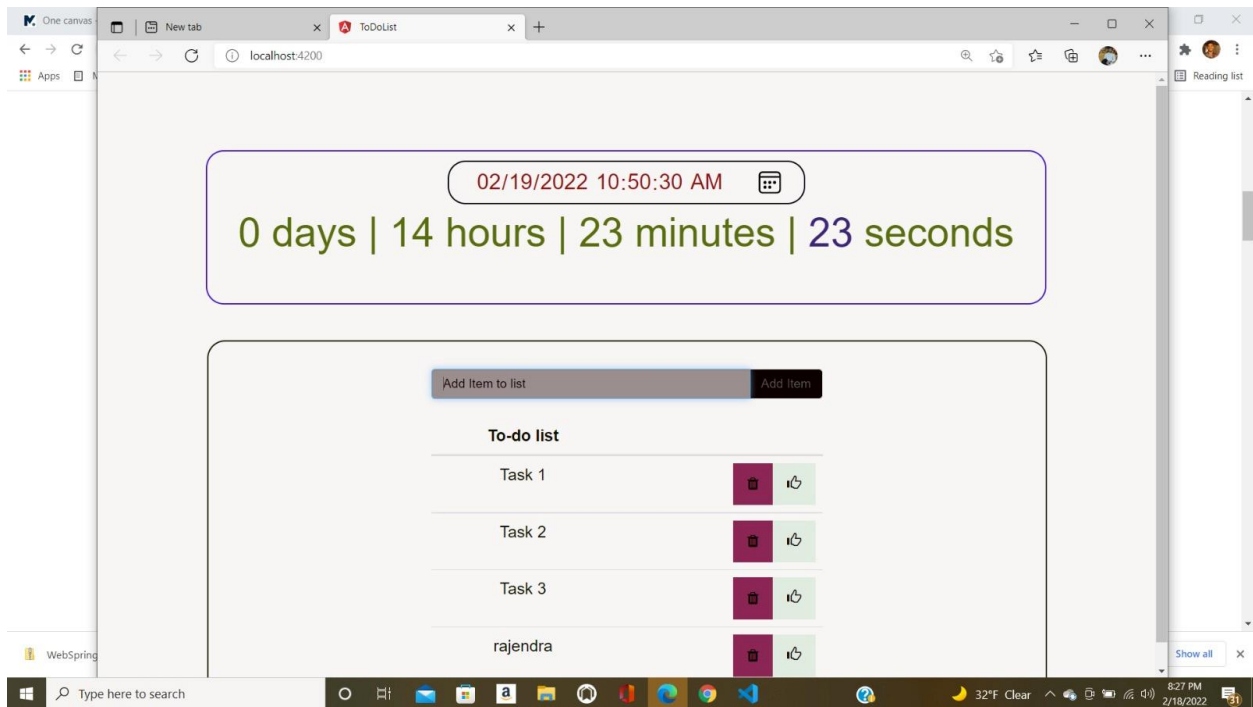

- 1. Below is the code to make add, delete and complete a task in the To Do Application:**

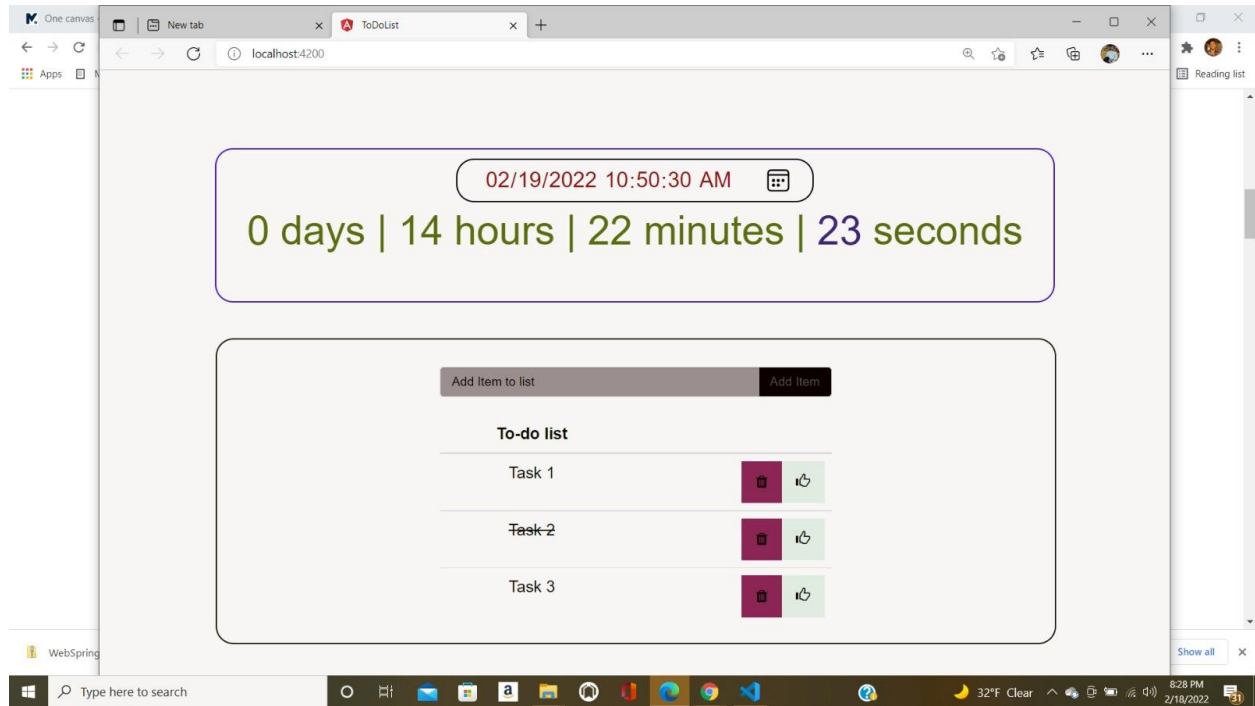

## 2.Outputs:

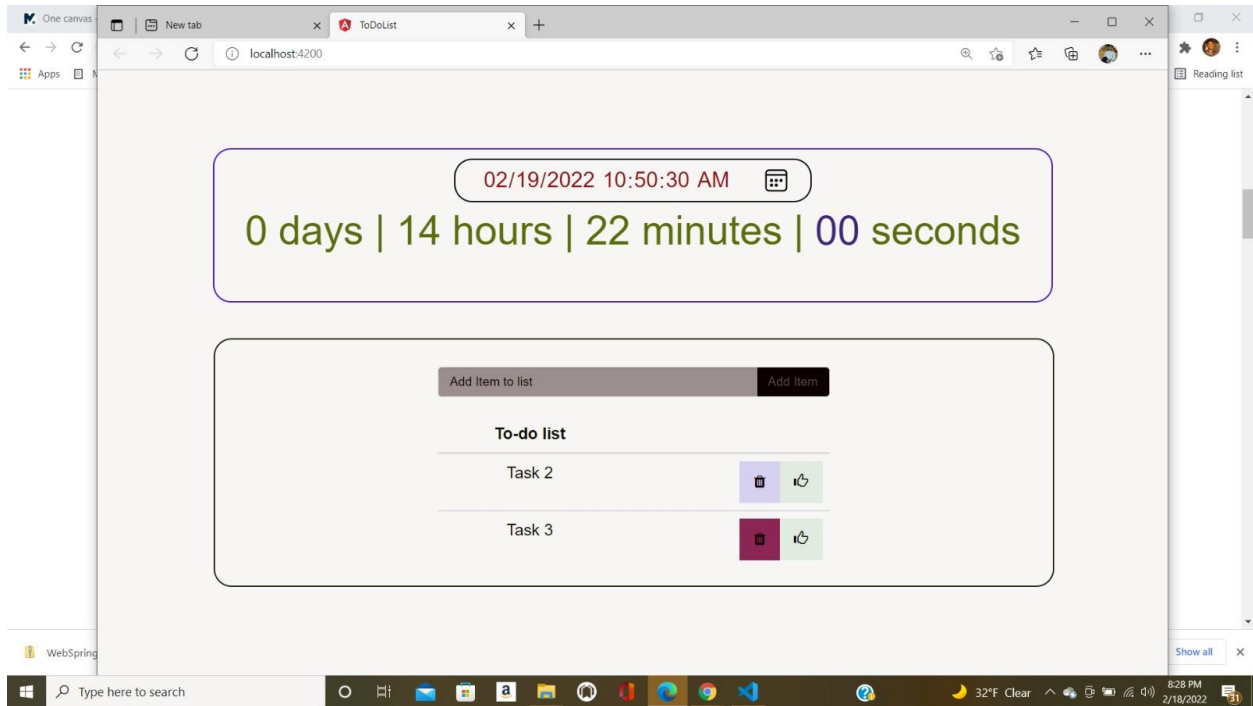

**After adding a task in the application, New task “ Rajendra ” is added at the end of the list**

Now we have Completing a task and then it got striked through showing that the task is finished

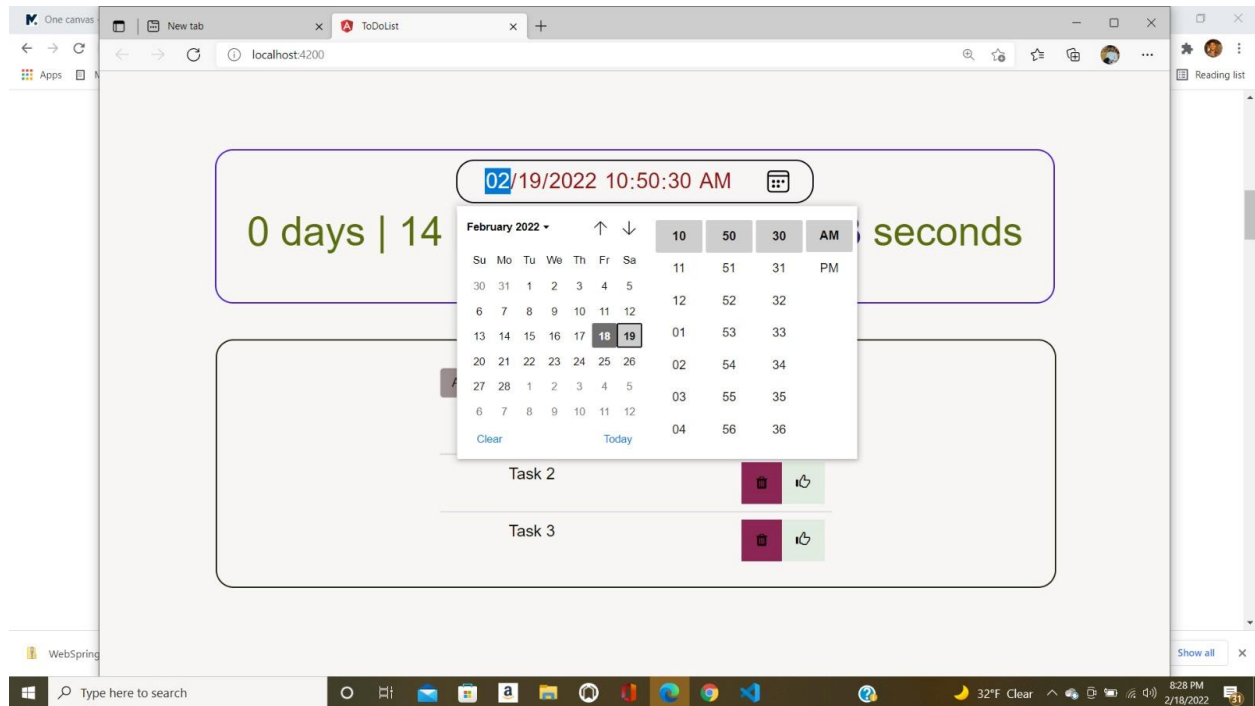

We have clicked delete to remove the task and it got removed from the list.

# TASK 2 – COUNT DOWN TIMER

We are selecting a from the date picker

2. Once we have selected the date, Count down timer starts running and the following sections of the date are shown as Days | Hours | Mins | Secs
